

CORROSION PROBLEMS SOLVED

MATCOR and CP Masters, both well-established independent companies with over 70 years of combined history, joined forces in 2015 under the ownership of Brand Energy & Infrastructure Services (now BrandSafway) and the MATCOR name. MATCOR continues to grow, offering customers a powerful combination of expertise, services and proprietary products to solve the corrosion problems of energy and other infrastructure markets.

Minimized Risk

Asset Life Extension

Regulatory Compliance

Environmental Stewardship

These are the benefits MATCOR customers enjoy in terms of value and the environment. With decades of experience, MATCOR safely and cost-effectively delivers direct turnkey cathodic protection and AC mitigation solutions.

MATCOR supports customers with dedicated teams of strategically located and highly skilled professionals, along with one of the largest fleets of construction equipment in the industry. Our teams include top AMPP-certified engineers, DOT operators and qualified technicians.

Expert Corrosion Engineering

Our NACE-certified corrosion engineering team delivers a broad range of services that support corrosion prevention of major infrastructure assets. These corrosion engineering services, including evaluation, budgeting, design and consulting are performed by top experts in the field to help operators:

IDENTIFY
corrosion and safety risks

DESIGN
safe, cost-effective systems

MANAGE
corrosion prevention programs

MAINTAIN
performance and safety

Construction and Installation

Experience, training and an impeccable safety record make MATCOR the logical choice for cathodic protection and AC mitigation system installations and project management. We have the largest fleet of advanced vertical and horizontal drill rigs and installation equipment in the industry.

Skilled installation and construction crews provide consistent high quality work, no matter how difficult the challenges. MATCOR crews perform deep anode, shallow ground bed anode, tank anode, AC mitigation and grounding, remote monitoring and solar powered CP system installations throughout the US. Crews also perform water well drilling, plug and abandonment, and core drilling for coal mines.

Decades of expertise and a proven management approach enables MATCOR to safely and cost-effectively complete your cathodic protection and AC mitigation projects.

Leading Cathodic Protection and AC Mitigation Products

MATCOR is the only company in the industry with a history of corrosion industry product innovation spanning five decades. Our proprietary products, including cathodic protection and AC mitigation materials and complete solutions, are manufactured in our Chalfont, Pennsylvania ISO 9001:2015 facility. We tailor corrosion prevention solutions to fit your unique needs while meeting your delivery requirements. Our commitment to manufacturing in the USA with quality materials and advanced manufacturing processes assures our customers:

Total control of product quality

Flexible manufacturing for quick turnarounds

Stringent safety programs

Long lasting, eco-friendly mixed metal oxide (MMO) technology in MATCOR proprietary products

Technical Services

MATCOR offers monitoring and maintenance critical to ensure maximum asset life, protect the environment and sustain safe daily operations. Our engineering and technical teams work diligently to evaluate your system's performance. We then recommend and implement solutions to keep it running safely, efficiently and cost-effectively.

Utilizing the latest survey equipment, our full time crews work to complete diverse external corrosion direct assessment (ECDA) services including close interval surveys (CIS), current attenuation (pipeline current mapper/PCM), alternating current voltage gradient (ACVG) and direct current voltage gradient (DCVG).

MATCOR provides:

An excellent safety record

Crews that are AMPP trained, full-time employees

Timely data and reports

APPLICATIONS

-  PIPELINES
-  TANKS
-  PLANTS
-  MARINE
-  WATER
-  AC MITIGATION

TURNKEY APPROACH

MATCOR products and services protect infrastructure assets from corrosion. Shown above is one of our HDD rigs installing MATCOR SPL™-Anodes to protect aboveground storage tanks.

Our corrosion experts assist with your project from start to finish:

- Feasibility
- Design
- Manufacturing
- Installation
- Assessment
- Maintenance

TURNKEY CATHODIC PROTECTION & AC MITIGATION SOLUTIONS

Who can you trust for all of your corrosion prevention requirements? MATCOR brings you the industry's top experts, unsurpassed direct services and proprietary materials. Our experts understand corrosion prevention from requirement and feasibility to design, manufacturing, installation, assessment and maintenance. For many decades, we have designed, installed and maintained thousands of cathodic protection and AC mitigation systems around the globe.

SERVICES

- Consulting
- Design
- AC Modeling
- Surveys
- Placed Technicians
- Supervision
- Inspection
- Installation
- Drilling – Vertical
- Drilling – Horizontal

PRODUCTS & SYSTEMS

- Deep Anode
- Shallow Ground Bed
- Tank Ring Anode
- AC Mitigation
- Linear Anode
- Water Tank
- Solar/Auxiliary Power
- Lightning Protection
- Rectifiers
- Test Stations

APPLICATIONS

- Pipelines
- Tanks
- Plants
- Marine
- Water
- AC Mitigation
- Coatings

MATCOR BY BRANDSAFWAY

MATCOR is a BrandSafway company and part of BrandSafway's Integrity Services Group, which supplies customers with safe, integrated and high-performing asset management and protection services, as well as regulatory compliance solutions. For more information, please visit www.brandsafway.com.
